

The method to organize back-up copy
at computer installation under VM CMS
with a large number of disk drivers

S. A. Kulikov, A. E. Shevel

Abstract

The paper describes the set of programs and REXX procedures dedicated to realize back-up copy for reasonable number of large disks (some tens of 317 MB disks). The authors show a high level of all back-up operations including needed book-keeping. The described back-up system runs under VM CMS.
