

Information

The 2nd International Workshop on the “MUON“ Project

will be take place at PNPI, Gatchina, 14-18 June, 2004.

The main goal of this meeting is the detail discussion of the current status of analysis of the 2003 data production run, the demonstration of the new TPC- detector and hydrogen purification system currently under production at PNPI and approval the schedule of the next run on the muon beam at PSI (Switzerland).

The “MUON” project directed on the precision measurement (on 1% level) of muon capture rate by a free proton with the goal to measure the induced pseudoscalar form-factor g_p to 7%.
