CONTENTS

1

ELEMENTARY PARTICLE PHYSICS. EXPERIMENT

New measurement of electric dipole moment of neutron 4
Estimate of electric polarizability of neutron 7
Neutron lifetime measurement with UCN gravitational trap 8
Measurement of electron-neutron spin asymmetry in neutron beta-decay 11
On neutron EDM search by diffraction method 13
Status of experiments searching for P-, T-violation in molecules 15
L3 experiment at LEP (CERN) 16
Measurement of asymmetry parameter in radiative decay $\Sigma^+ \to p + \gamma$ (E761 experiment, FNAL) 22
First observation of spin precession of polarized sigma — hyperons channeled in bent crystals 24
New measurement of K^--mass 26
Vector analyzing power iT_{11} in $\pi^+ d \to pp$ reaction in energy region 350-450 *MeV* 27
Measurement of spin rotation parameters R and A in πp elastic scattering in region of low-lying pion-nucleon resonances 29
Measurements of differential cross sections for binary $\pi^- p$ reactions with both neutral particles in final state in region of P_{11} (1440) and S_{11} (1535) resonances 32
Test of charge symmetry in $\pi^{\pm} d$-elastic scattering at $T_\pi = 147$ *MeV* energy 33
Circular polarization of γ-quanta from $np \to d\gamma$ reaction with polarized neutrons 35
Momentum distribution of nucleons in deuteron from quasielastic break-up at 1 *GeV* 37
Measurement of the polarization parameters for $\vec{d}p \to \vec{p}pn$ reaction in complete kinematics (experiment N 145 at Saturne, France) 39
Search for narrow dibaryon resonances in deuteron break-up reaction $pd \to ppn$ at 1 *GeV* in complete kinematics experiment 41
Experimental limit on existence of electron quasimagnetic (ARION) interaction 43
Experimental study of antineutrino scattering by electron at nuclear power plant reactor 45
Muonium to antimuonium conversion experiment at Dubna phasotron 46
Weak vector coupling constant from neutron β-decay 48

2

ELEMENTARY PARTICLE PHYSICS. THEORY

Classic states of goldstone and pseudo-goldstone fields 54
Double interference in neutral B-meson decays and possibility to measure the sign of Δm_B 54
Ward's identities and calculation of multiloop amplitudes in superstring theory 55
Baryon number non-conservation at high energies 56
Origin of mass spectrum for fermion generations. New mechanism 57
High-energy scattering in QCD and in quantum gravity and two-dimensional field models 58

3

NUCLEAR AND ATOMIC PHYSICS. EXPERIMENT

Hyperfine structure and isotope shift investigations of ^{145}Pm and ^{147}Pm 62
Identification of new Tl-isotopes at proton drip-line 63
Search for double β-decay of ^{76}Ge to excited state of ^{76}Se 65

Beta-decay energy measurements using total gamma-absorption spectroscopy 67
(*p*,2*p*) and (p,np) reactions on ^{23}Na, ^{29,30}Si, ^{31}P and ^{39}K at 1 *GeV* 69
Search for baryon and dibaryon resonances effects in (*p*,2*p*)-reaction on light nuclei at 1 *GeV* accompanied by cumulative protons 71
Parity violation investigation in ^{10}B(n,α) ^{7}Li reaction with polarized neutrons 73
P-odd and *P*-even effects in fragment angular distributions of ^{235}U fission induced by monochromatic polarized neutrons with energies $0.06 < E_n < 0.8$ *eV* 74
P-odd asymmetry of light fragment emission in polarized cold neutron fission of some heavy nuclei ... 75
On nature of 721.6 *eV* resonance in ^{238}U 77
DT fusion in triple H/D/T gas mixture 78
Investigation of fast muon transfer in $D_2 + {}^3$He mixture 81
Search for nuclear fusion reaction in ^{3}Heμd-system 83
Estimates of lifetime and production rate of massive nuclear-unstable fragments in disintegrations of ^{238}U nuclei induced by 1 *GeV* protons 85
Main regularities in relativistic projectile fragment transverse momentum distributions in nuclear emulsion 87
Intermediate mass fragment production in the interaction of 1 *GeV* protons with Au, Ag and Ni targets 89
Level structure of doubly odd nuclei in $A \approx 120 - 140$ region 91
Manifestation of electrodynamics parameters in energies of nuclear states and in particle masses 92

4

NUCLEAR AND ATOMIC PHYSICS. THEORY

Heavy quark production in soft hadron collisions at superhigh energies 98
Coulomb deexcitation of excited muonic hydrogen 99
Isotope exchange reactions in mixture of hydrogen isotopes 101
Elastic p— ^{4}He scattering at intermediate energies 102
Landau-Zener mechanism for nuclear friction 105
Calculation of ionization loss fluctuations of fast heavy charged particles 107
Calculation of *P*- and *P*-,*T*-odd effects in HgF and PbF 109

5

PHYSICS OF CONDENSED MATTER. EXPERIMENT AND THEORY

Anomalous interaction of ultracold neutrons with beryllium trap surface 112
Investigation of magnetic ordered state in $YBa_2Cu_3O_{6+x}$ ($0.06 \le x \le 0.32$) by muonic method 114
Vortex structure mobility and penetration depth measurement in $Bi_2Sr_2CaCu_2O_{8+\delta}$ textured sample . 116
Investigation of coexistence of superconductivity and magnetism in ceramics $YBa_2Cu_3O_{6+x}$ 117
Resistive state of HTSC 119
Analysis of oxygen contents in *HiT*$_c$ materials 119
Valent and charge state of antimony ions doped in Bi-containing HTSC-ceramics 121
Mixed valence state in various high T_C superconductors 122
High resolution neutron powder diffraction study of samarium hexaboride within temperature range 20-300 *K* 125
Polarized neutron diffraction by vortex line lattice in uniaxial superconductors 126
Neutron depolarization measurements of high-temperature and low-temperature superconductors 127
Study of electric and optical properties of high-T_c materials under neutron irradiation at different temperatures (30 and 300 *K*) and under high temperature annealing 128

Effect of neutron transmutation doping on the electrophysical properties of Si-Ge alloys 130
Gamma-ray diffractometry study of CaF_2/Si(111) heterostructures grown by MBE 134
Calculation of deformation parameters of CaF_2/Si(111) heterostructures grown by MBE 136
Distribution of trapped flux in Josephson medium 138
Supersymmetric approach in theory of Anderson localization 139
Ferrofluid dynamics: spin echo experiment 141
Study of spin waves in amorphous ferromagnet Fe — Ni — Cr — P by small-angle polarized neutron scattering 142
Noncollinear magnetic state in Heisenberg frustrated antiferromagnetic alloys of γ-Fe 145
Investigation of magnetic structure in R_2CuO_4 (R = La, Sr, Nd, Ce, Eu, Sm) by polarized neutrons ... 147
The effect of the intragranular irreversible magnetization on macroscopic properties of the ceramic high - T_c superconductors 150
Weak extra low frequency magnetic field and conductivity fluctuations in an electrode system 153
Conductance fluctuation spectroscopy of micellar solutions in flow 154
Internal structure of silica sol-synthetic polyamines colloid-polyelectrolyte flock complexes 156

6

MOLECULAR AND RADIATION BIOPHYSICS

Roles of oligophosphate and base fragments in triple complex of protein rega with nucleotide and double-charged cation 160
Chemical activation of α-galactosidase from trihoderma harzianum 162
Investigation of tautomeric structures of dialdehydepolysacharides 163
Tunneling of electron in HS^- oxidation by I_3^- complex in aqueous solution 165
Sorption of glucoamylase from Asp. awamori var X-100/D-27 on its own cell wall 168
Enzymatic composition of replicative complexes from rat liver 168
Contribution of $3' \rightarrow 5'$ exonukleases from rat liver nuclei in fidelity of DNA synthesis catalyzed by mammalian DNA polymerases α 169
Analysis of rat liver proteins by two-dimensional gel electrophores 171
DNA elongation in nuclei isolated from mammalian cells 172
Stability of posttranslocative complex 173
Mutant radiation-resistance alleles from Escherichia coli Gam^r 444: cloning and preliminary characterization 174
Functional consequences of C-terminal modification of reca protein from pseudomonas aeruginosa 176
Immunological detection of RecA-related proteins in bull meiotic nuclei 177
Frequency of exchanges promoted by conjugational recombination in Escherichia coli K-12 177
Genetic control of recombination exchange freguency in Escherichia coli K-12 178
Polymerase chain reaction (PCR) for diagnosis of virus infection: human cytomegalovirus 178
Conserving the biota: the way to ecological safety 179

7

REACTOR PHYSICS AND TECHNOLOGY

Reactor WWR-M irradiation possibilities 182
Analysis of neutron bursts in reactor WWR-M by means of phase trajectories 182
Gaps measurements in WWR-M core 185
Temperature conditions of fuel elements of WWR-M5 type fuel assembly in air 188
Experimental ensuring of safety start-up of reactor PIK 189
The power measurements of the critical assembly "Physical model of the PIK reactor" 190
Distribution of the energy release in the reactor PIK core (from results, measured on PM PIK) 192

Central experimental channel radiation characteristics of the PIK reactor 194
Advanced irradiation of surveillance specimens (SS) of vessel inside the PIK reactor core 196
Possibility of increasing the ratio of maximum thermal neutron flux density to reactor's power in research reactor's reflector 198
Zirconium fuel element of reactor PIK 199
Hydraulic characteristics of the reactor PIK fuel elements 201
Measurements of thermal conductivity of carbon wool "Carbotextim-B" at high temperature 202
Synthetic activated charcoal type of SKN-2K study for the hydrogen isotopes high cleaning 204

8

METHODS AND APPLIED RESEARCHES

FTC detector in L3 experiment (CERN) 208
First result of study of 70 *GeV* proton beam focusing by bent crystal 211
Programme quality assurance in radiosurgery carried out at the LNPI synchrocyclotron and experience in stereotactic proton therapy 213
Universal cold and ultracold neutron source at PIK reactor 215
Contour of liquid hydrogen natural circulation in the universal neutron source at WWR-M reactor 216
New highly efficient method of atomic spectroscopy for nuclides far from stability 218
Identification of π-mesons and Σ-hyperons in the 600 *GeV/c* beam. (Experiment E-781) 220
New method for measurement of electron drift velocity in drift chambers 222
Laser streamer detector for low energy hadron-proton scattering study 224
Chromatographic separations of polonium and tellurium and production of polonium sources for drift chambers 225
Study of energy deposition from nuclear reactions in microvolumes of matter 227
Influence of accelerated particles beams on formation of long spark discharges in gases 228
Intermetal compounds for deep purification of hydrogen isotopes for muon catalyzed fusion experiments 230
Radiation hardness test of barium fluoride scintillator 232
X—Y silicon strip detector tracking station 233
Experimental stand for microstrip detectors testing 236
Si microstrip detectors of charged particles 237
Film decorating application for structure perfection evaluation of high purity materials for silicon detectors 240
Nuclear detectors and photodetectors using amorphous-crystalline heterostructures 242
Application of DLTS method in development of microstrip detector technology 245
Fe—Al neutron polarizing supermirror on Si crystal substrate with antireflecting Cd layer 246
Investigation of potentially toxic trace elements in coals and their behaviour during coal combustion 248
Determination of heavy metals in environmental water by total reflection X-ray fluorescence method using optimized roentgen optics cut-off filter 249
