PNPI
RESEARCH REPORT
1992 • 1993

GATCHINA
1994

УДК 576

The present edition is a continuation of the collection "LNPI Research Report". It contains the main results of experimental and theoretical research in elementary particle physics, nuclear and atomic physics, physics of condensed matter, reactor and accelerator physics and technology, molecular and radiation biophysics, and results of methodical and applied works in 1992–1993. Most of the experiments have been performed on the proton synchrocyclotron and the nuclear reactor of the PNPI. Physicists of some scientific institutions of the former USSR and other countries have participated in a number of the experiments. Scientists of the PNPI also took part in collaborations in foreign nuclear centres.
